EDUCATION

Pangasinan State University | 2022 – 2026

Bachelor of Science in Information Technology

Lingayen, Pangasinan, Philippines

EXPERIENCE

eGov Hackathon 2026 | July 2026

Frontend Developer

Taguig City, Philippines

- Engineered responsive mobile UI screens and dynamic citizen navigation workflows using Flutter, delivering a consistent 60 FPS user experience across diverse Android devices and screen sizes.
- Designed accessible interactive forms and career-tracking dashboard cards, improving user onboarding completion rates and reducing input validation errors.

CNT Promo & Ads Specialists, Inc. | February 2026

Full-Stack Developer

Mandaluyong City, Philippines

- Developed and deployed a centralized internal communications portal using Next.js and PostgreSQL, replacing fragmented announcement channels with a centralized platform for company-wide information sharing.
- Leveraged AI-assisted development tools to support boilerplate generation, unit testing, and schema refactoring, improving the efficiency of the development workflow.
- Containerized web services using Docker and configured Nginx as a reverse proxy, eliminating environment configuration drift and ensuring consistent production deployments.

PROJECTS

Pulse | *Next.js, PostgreSQL, WebRTC, HLS, MediaMTX, Docker, Nginx, Redis, Websocket* August 2026

- Architected a full-stack corporate social platform from scratch, enabling real-time threaded communications and dynamic polling across company departments.
- Implemented granular Role-Based Access Control (RBAC) and automated post-moderation workflows to ensure strict enterprise data governance.
- Engineered a hybrid WebRTC and HLS low-latency live streaming pipeline using MediaMTX, facilitating company-wide real-time broadcasts with sub-second stream synchronization.

CNT CloudSpace | *Next.js, MongoDB, Nginx, Npm2*

February 2026

- Refactored the corporate landing portal using Next.js and Tailwind CSS, optimizing static and server-side rendering to improve application performance and page loading.
- Constructed an automated digital bulletin board module with scheduled content expirations, reducing the need for manual announcement management.
- Built an interactive employee directory with dynamic search and department filtering, streamlining new hire onboarding and team discovery.

SKILLS & INTERESTS

Languages / Web : JavaScript (ES6+), TypeScript, SQL, Dart, HTML5/CSS3, WebSockets

Frameworks & Libs : Next.js, React, Node.js, Express.js, Tailwind CSS, Flutter, Drizzle ORM

DevOps & Tools : PostgreSQL, MongoDB, Redis, Docker, Kubernetes, CI/CD, Git, GitHub, Nginx, Postman
